Denize Bassi Figueiredo

Fullstack Software Developer | Knowledge in .NET, PHP, SQL, and DevOps | Passionate about Innovation and AI-driven Solutions
Joinville, Santa Catarina, Brazil

Summary

As a backend C# developer, I have gained extensive expertise in frameworks like .NET and .NET Core, coupled with a strong command of databases such as MySQL and SQL Server. My proficiency extends to ORMs, particularly Entity Framework, and I have applied my Docker knowledge to create standardized environments for each project, enhancing development efficiency.

Although my strong suit is C#, I have some knowledge of Python, PHP, C++, C, and a few other languages that I use in work or personal projects.

I have continuously expanded my knowledge in cloud technologies, focusing on AWS and GCP. I have integrated infrastructure as code using Terraform and managed CI/CD pipelines with GitHub Actions. My approach to building robust solutions has involved applying design patterns such as MVC, Factory, Builder, Facade, and Adapter, along with a solid understanding of Domain-Driven Design (DDD) for comprehensive system modeling.

On the frontend, I have worked with HTML, CSS, and Vanilla JavaScript, as well as frameworks like Vue.js.

In addition to coding, I have become proficient in essential development tools such as Git/GitHub and SVN for version control, implementing design systems, and managing tasks efficiently with Jira.

I am eager to embrace new challenges and opportunities to apply my passion for software development, contributing to innovative and impactful projects.

———

Experience

AD Digital
Media solutions analyst II
September 2024 - Present (6 months)
Brazil

As a dynamic professional, I excel in roles that require technical expertise and innovative problem-solving. At TV Globo, I play a key role in the development and maintenance of media solutions, including implementing MVPs for Cognitive Asset Management and maintaining Media Asset Management systems. My achievements include mapping robust solution architectures, simplifying software delivery processes, and testing in development environments, among others.

BRCondos
Web Developer Full Stack .NET / C# / Vue.JS
January 2023 - September 2024 (1 year 9 months)
Joinville, Santa Catarina, Brazil

As a member of the development team, I play an active role in the software development lifecycle. I contribute to the development, implementation, and testing of new features, as well as the continuous improvement and optimization of existing functionalities. My primary focus is on utilizing modern .NET Core technologies, such as asynchronous tasks, EF6, and HttpClient, to ensure the efficiency and quality of our code.

Desenvolvedor web freelancer
October 2022 - January 2023 (4 months)
Joinville, Santa Catarina, Brasil

Rede Globo
6 years 10 months

Audiovisual Systems Technician
May 2014 - October 2019 (5 years 6 months)
Rio de Janeiro, Brasil

My main responsibility in the broadcasting department was to deliver Globo Rio's programming with quality. When the system changed, I had the opportunity to help my colleagues use the new system. As a coordinator, I conducted the training sessions and closely monitored the transition, ensuring a positive impact as no commercials were affected during the system change. While part of the signal traffic team, I participated in major events such as Carnival and the World Cup in Russia, working daily with external journalism

teams to secure signals and links for recorded and live broadcasts, always focusing on delivering quickly and with the best possible quality.

Videotape Operator
January 2013 - April 2014 (1 year 4 months)
Rio de Janeiro

I participated in BBB13 as a Videotape Operator and was responsible for full recordings. During my second service period, I stood out by performing my work with quality and speed, which led to my recommendation for a permanent position.

Education

UniSociesc Centro Universitário
Diploma, Game Development · (July 2022 - December 2025)

Seneca College
Diploma, Computer programming · (2021 - 2023)

Lemos de Castro
Technical Course, Eletronic · (January 2012 - December 2012)

Colégio Paralelo
Technical Course, Business · (2006 - 2008)
